DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 24-30, drawn to an extension device comprising an identification-information-acquisition unit, classified in class 361, subclass 737 and class 382, subclass 115.
 - II. Claims 20-23 and 31-33, drawn to an information-processing device, classified in class 710, subclass 62.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed information processing device does not describe the specific operation unit which prompts movement of the carrier unit or the specific side connectors of the extension device. The subcombination has separate utility such as a portable, interchangeable extension device (IC card or the like) having an identification-information-acquisition device such as a fingerprint reader.
3. If applicant elected to prosecute the invention in Group I, election is also required to one of the groups shown below.

Art Unit: 2623

III. Claims 1-16 and 28-30, drawn to an extension device, classified in class 361, subclass 737.

IV. Claims 17-19 and 24-27, drawn to an identification-information-acquisition device, classified in class 382, subclass 115.

4. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a portable extension device such as an IC or PCMCIA card for use in a laptop computer. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
